

Smart India

Team Guidelines

A great team strives to strike a perfect balance between business and technology. As Productathon is a team event, the team is expected to develop and not just ideate the solution.

Judging Criteria:

The teams would be judged on following parameters:

- 1) Out of the box thinking (already existing vs new solution)
- 2) Completeness of the solution (stage: idea, development, prototype, deployment)
- 3) The practicality of the proposed solution
- 4) Cost-effectiveness of the solution
- 5) Ease of scalability
- 6) Sustainability of the solution
- 7) Quick to implement solutions would be appreciated

THEMES

Cities across the globe, emerging markets in particular, are witnessing significant urbanization. In the next 15 years, India will see about 200 million people migrating to cities, which is almost equal to the current combined population of the UK, France, and Germany.

1. **Creating Community for the city**
2. **Water Management**
3. **Solid Waste management**
4. **Safety & Security**
5. **Public Health**
6. **Digital Connectivity**
7. **Creating Community**
8. **Promoting a variety of transport options**
9. **Come up with you own theme**

The Hackathon participants are encouraged to put on their technological hats and provide sustainable solutions for the city based on the theme or creating their own idea for smart city.

The ideal participating team would be a solution provider with a ready and mature solution. The team would be expected to provide/develop a working platform/model which solves the problem of smartcity.
